# Four ingredients to make anything

Define and give examples of the four types of productive resources.

**Name:** _____ **Date:** _____

**IN PLAIN WORDS**

Everything made needs four ingredients: natural resources (from the earth), human resources (workers), capital (tools & machines), and entrepreneurs (risk-takers who put it all together).

## WHICH RESOURCE IS IT? CIRCLE YOUR ANSWER

Tall trees growing in a forest.

Land Labor Capital Risk-taker

Water flowing in a river.

Land Labor Capital Risk-taker
