Sector Town

Color the town by sector, then draw how money moves between the four sectors.

Name: _____ Date: _____

1. Pick a different color for each sector. Color the small square in its key box.
2. Color each place in Sector Town with the color of the sector that does that job.

Household
Works and buys
☐ my color

Business
Makes and sells
☐ my color

Bank
Saves and lends
☐ my color

Government
Taxes and serves
☐ my color

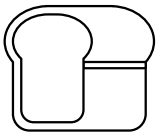

Welcome to Sector Town

1

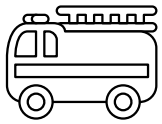

Your family's home

2

Bakery

3

Fire station

4

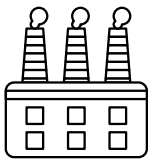

Bank on Main Street

5

A worker on her way to a job

6

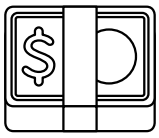

Bike factory

7

Public school

8

Savings account

9

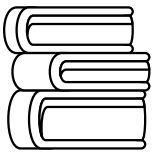

A family buying shoes

10

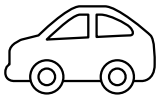

Grocery store

11

Public library

12

Loan for a new car

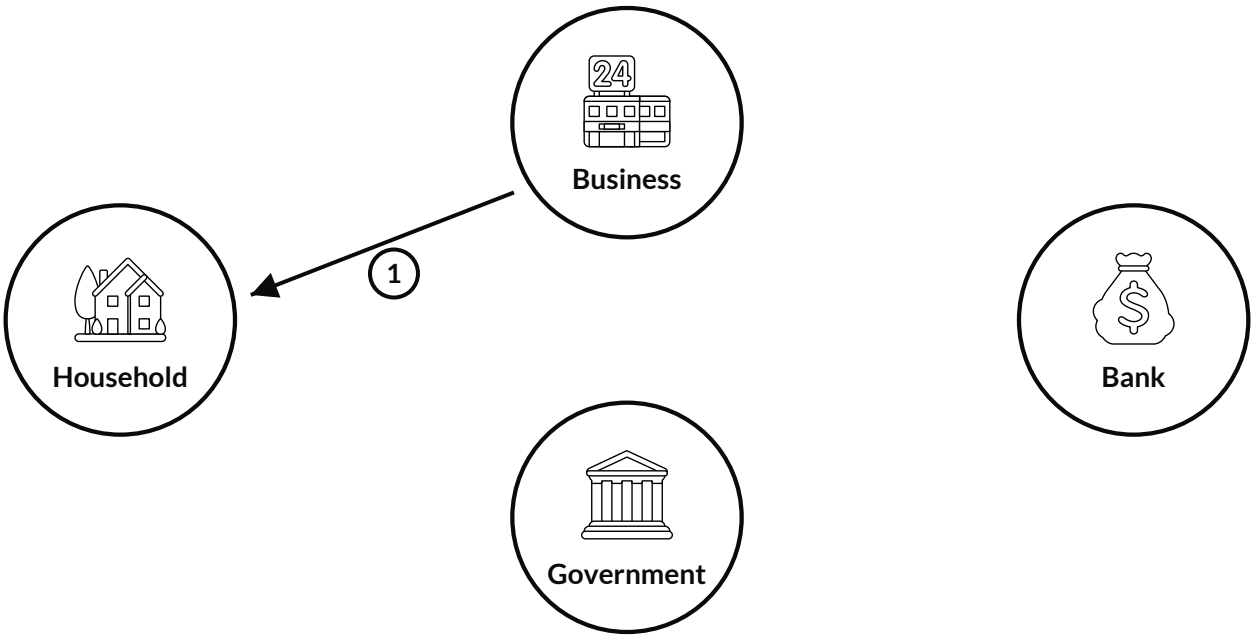

Sector Town

Color the town by sector, then draw how money moves between the four sectors.

The money loop

For each money move below, draw an arrow from the sector that pays to the sector that gets the money. Write the move's number on the arrow. Number 1 is done for you.

1. Wages: a business pays its workers.
2. Spending: a family buys bread at the bakery.
3. Taxes: a family pays sales tax on new shoes.
4. Savings: a family puts money in a savings account.
5. A loan: the bank lends money to the bike factory.
6. Interest: the bike factory pays back its loan, plus interest.
7. Salary: the town pays a firefighter.
8. Buying for the public: the town buys a fire truck from a company.

Think about it

The firefighter's salary comes from taxes. Which sectors paid those taxes? Look at your arrows for a clue.

Bonus

Which sector got money from three different sectors? Name it and the three moves.

Sector Town

Color the town by sector, then draw how money moves between the four sectors.

For grown-ups

What this sheet practices

SS5E2 (a) to (d): the job of each of the four sectors. Households provide work and buy goods and services. Businesses produce goods and services. Banks keep checking and savings accounts and make loans. Government collects taxes and provides public goods and services, like schools, libraries, and fire protection.

How to use it in 5 to 10 minutes

1. Read the four key boxes together. Ask for one example of each from your own town.
2. Color the 12 places in Sector Town, about 5 minutes.
3. On page 2, draw the eight arrows. Talk through why each arrow points the way it does.

Answer key

Sector Town: 1 home, Household. 2 bakery, Business. 3 fire station, Government. 4 bank, Bank. 5 worker, Household. 6 bike factory, Business. 7 public school, Government. 8 savings account, Bank. 9 family buying shoes, Household. 10 grocery store, Business. 11 public library, Government. 12 car loan, Bank.

Money loop: 1 Business to Household. 2 Household to Business. 3 Household to Government. 4 Household to Bank. 5 Bank to Business. 6 Business to Bank. 7 Government to Household. 8 Government to Business.

Think about it: households paid them on page 2. Businesses pay taxes too, so “households and businesses” is also right.

Bonus: Business. It gets money from Household (move 2), Bank (move 5), and Government (move 8).

One question to talk about

Which of these four sectors did your family deal with this week? What did each one do for you?

Sector jobs follow the Georgia standard. See worthit.money, SS5E2, for the paycheck story and sources.
